MSRP: \$1495

Next Generation Battery for Symmetra LX

100% New - 100% Compatible

Now you have a choice in NEW batteries for your Symmetra LX. The SYBT5 is completely NEW, with new shell, new logic board, new CSB batteries, and new features.

More Runtime - More Power

The SYBT5plus features more powerful batteries to deliver more runtime. The new logic board communicates with the LX to show the increased runtime of the SYBT5plus unit.

Reset-able Monitoring Board with Datalogging

Unlike the original SYBT5, the SYBT5plus battery can be reset after faults without costly replacement of boards or trays. Also, the SYBT5plus logic board records battery operation for better analysis of lifetime and maintenance.

**SYBT5plus works
like the
original,
